

## A New MPF Choice A New Way Forward

The Default Investment Strategy (“DIS”) has been launched. The DIS is a new choice tailored for retirement investment.

Made up of 2 mixed assets funds, the DIS has 3 key features:

- Automatic reduction of investment risk as members approach retirement age
- Fee cap level of 0.95%
- Investing in global markets for risk diversification

**Scheme members can choose to invest their MPF benefits according to the DIS or in the 2 mixed assets funds under the DIS – the Core Accumulation Fund and the Age 65 Plus Fund.**
