Explanatory Notes on Quarterly Return of Constituent Fund

1. Asset Allocation

This information is being gathered and compiled with the intention of producing a high level assessment of the exposure of the respective constituent fund to the broad investment classes, being deposits, debt securities and equities, and to assess the geographical and currency exposure of the constituent fund.

For constituent funds maintaining a feeder fund or portfolio management fund structure, the exposure of the constituent fund should be the aggregate of those of the underlying funds. The reported allocation should be expressed as a percentage of total net asset value of the fund, according to the following:

- (a) Deposits and cash should be reported based on the currency of denomination of the respective account.
- (b) Debt securities include debt and convertible debt securities. These should be reported based on the currency of denomination.
- (c) Equities, including warrants, American depository receipts and global depository receipts, should be reported by the country of primary listing.

2. Effective Currency Exposure

This information should represent the economic exposure of the constituent fund to the respective currencies at the end of the quarter.

The effective currency exposure of a particular currency should be calculated based on the position of net assets in that currency and adjusted for any open currency forward contracts. For constituent funds maintaining a feeder fund or portfolio management fund structure, the exposure to the respective currencies should be the aggregate of those of the underlying funds.

3. Investment Return

- (a) For unitized funds, net investment return for the quarter should be the simple return calculated in Hong Kong dollar terms on a unit NAV-to-NAV basis, i.e.
$$\{ [\text{Unit NAV (end of reporting quarter)} / \text{Unit NAV (end of previous quarter)}] - 1 \} \times 100.$$
- (b) For non-unitized guaranteed funds, the methodology of calculation of the net investment return should be consistent with the above methodology and the basis of calculation should be disclosed.
